- ☐ a) They are not allowed in C.
- ☐ b) The "else" part is mandatory for every "if" statement.
- ☒ c) They allow you to test multiple conditions and execute different blocks of code based on the results.
- ☐ d) Nested "if-else" statements are only allowed up to two levels deep.

Yes, the answer is correct.

Score: 1

Accepted Answers:

c) They allow you to test multiple conditions and execute different blocks of code based on the results.

4) What happens if there is no "else" part in an "if-else" statement? **1 point**

- ☐ a) The program will not compile.
- ☐ b) The program will crash at runtime.
- ☐ c) If the condition is true, nothing happens; if the condition is false, the program crashes.
- ☒ d) If the condition is true, the program executes the code inside the "if" block; if the condition is false, nothing happens.

Yes, the answer is correct.

Score: 1

Accepted Answers:

d) If the condition is true, the program executes the code inside the "if" block; if the condition is false, nothing happens.
